COWGILL AND ROGERS

*"On both sides of the Bay"*

PERENNIALS, ALPINES AND ROCK PLANTS

11

Belvoir Manor where Francis Scott Key spent part of his childhood and youth. Built about 1730 by his great grandfather.

MISS KATHLEEN COWGILL  
THE LOMBARDY NURSERIES  
EASTON, MD.

MRS. WM. COLEMAN ROGERS  
BELVOIR MANOR FLOWER FARM  
WATERBURY, A. A. Co., MD.

## *More Than a Commercial Aim*

For a number of years Miss Kathleen Cowgill and Mrs. William Coleman Rogers, proprietors of the combined Lombardy Nurseries and Belvoir Manor Farms, devoted themselves to plant collecting as a hobby.

They made more or less of a specialty of rare specimens, alpine and perennials from various countries and of experimenting with them, with the object of learning which of them were adaptable to Maryland soil and climatic conditions.

Their work and observation, so painstakingly and lovingly followed, put them in the way of many delightful discoveries and resulted further in the accumulation of a fund of knowledge about different species and varieties decidedly worth handing on to others interested in the more unusual plant material.

Hence, when they finally decided to enter the professional growers' field, they did so, not only with the assurance which experience and thorough information alone can provide, but with the desire to meet exacting demands and, at the same time, to establish such a relationship with their patrons as exists, say, between the dealer in fine objects of art or books with his clientele.

The Lombardy-Belvoir Manor establishment, in a word, has far more than a merely commercial aim. It hopes to be the means of introducing into Maryland gardens many beautiful plants which their owners, perhaps, do not dream can be grown in this state.

Among these flowers grown from seed imported from England and other foreign lands, rock plants and other perennials that will bring an unaccustomed but very decidedly charming note of novelty to any collection.

The growing fields are located almost exactly opposite each other with the Chesapeake Bay between—the Lombardy Nurseries at Easton and the Belvoir Manor Flower Farms at Waterbury, Anne Arundel County. This difference of exposure and soil has given these experiments a broader scope than would otherwise have been possible. When you buy this stock, you may be assured that it is adaptable to the requirements of this part of the country.

Because the proprietors have a special flair for the unusual in plant life, does not mean that they pay no attention to the commoner things. Far from it. For this collection includes most of the dependable standbys without which no garden is complete.

In addition to filling nursery orders, Miss Cowgill and Mrs. Rogers maintain a Landscaping Department equipped to carry out any kind of a plan desired or to supply original ideas. In the designs they suggest, the aim is to get away from the exotic garden which so often is entirely out of place in any but the locality of which it is characteristic. Emphasis is put upon schemes that really "belong"—that are, so to speak—part and parcel of Maryland tradition and atmosphere.

## *Terms*

---

All shipments are sent at purchaser's expense, by express, parcel post, or freight.

All plants are sold and all plans and plantings are made for cash only.

Plants, except in the case of a few which can be transplanted from pots only, are all large field grown specimens, which will bloom the first year if planted early. There are a few, such as peonies, which bloom only after becoming thoroughly established.

Plants are sent out in good condition. We are not responsible for them after they leave our hands. Colors of plants grown from seed cannot be guaranteed. All plants grown from division or cuttings will be replaced if not true to name and color.

Prices in this catalogue are subject at all times to changes in the market. All are sold subject to above conditions.

We maintain a landscape service and will gladly submit plans or give advice and cultural directions. We quote roses, shrubs and evergreens if desired. Our box specimens are especially fine.

Members of the firm are open to engagements to speak before clubs on garden subjects.

Direction for reaching Belvoir Manor: cross Hanover Street Bridge, through Glen Burnie on South Shore Boulevard, through Cross Roads and Crownsville.

Phone W. C. Rogers, Annapolis 1857-F-12.

Additions to this Catalogue will be sent out from time to time.

VISITORS ARE WELCOMED AT ALL TIMES.

Visitors may select blooming plants to be delivered in planting season.
